**What two types of specimen alcohol tests usually conducted by the MPs or the MTF may be evidentiary?**

**Breath and Saliva**

**Blood and Urine**

**Breath and Blood**

**Blood and Saliva**

# Check Point

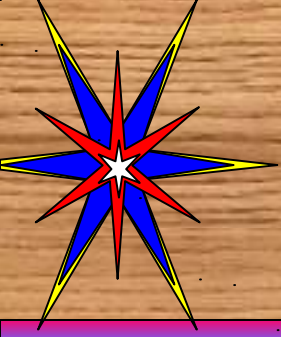

**That is  
CORRECT, Great Job !!!**

# Check Point

**Sorry, but you are  
incorrect.**

# Evidentiary Vs Non-evidentiary

- ▣ **Evidentiary simply means that the test results can be used in a board or courts martial**
- ▣ **Non-evidentiary means that the test results cannot be used in a board or courts martial**

# Alcohol Testing

- ▮ **Legal Limits for personnel on duty**
  - ▮ **Per AR 600-85 paragraph 1-34b.:**
    - ▮ **A Soldier with a Blood Alcohol Content (BAC) of greater than or equal to 0.05% is considered to be impaired on duty and is subject to UCMJ action.**
    - ▮ **The Soldier MUST have known that he/she was scheduled for duty at the time of the test.**

# Specimens for Alcohol Testing

- ▣ There are 5 basic specimens that can be used to test for alcohol:
  - ▣ Saliva
    - ▣ Non-evidentiary
    - ▣ Some of your installations may have and use these disposal test kits to screen soldiers. A swab is saturated by the soldier with saliva and the saliva is tested for a color change. If the saliva test is positive then the soldier may be tested using an evidentiary method.

# Evidentiary Requirements

- ▮ **For an alcohol test result to be considered evidentiary it must meet the following Requirements:**
  - ▮ **The test must have chain of custody documentation**
  - ▮ **The Instrument used must be calibration**
  - ▮ **The Instrument operator must be certification usually by the manufacturer on an annual basis**

# Getting a Evidentiary Test

- ▮ **Most installation have two possible evidentiary tests available; check with your local SOP and ASAP for procedures:**
  - ▮ **An evidentiary breath test by the Military Police.**
  - ▮ **An Evidentiary Blood test at the Medical Treatment Facility.**
